

INSTRUCTIONS

CURRY INSTRUCTIONS

Most of these dishes are to be reheated in a pan until piping hot (above 72 degrees) just let them defrost first.

It's always great to have a bit of fresh coriander or lemon to finish the dishes off too!

PULAO

Either ping in a microwave for a few minutes until steaming or reheat in pan or oven!

NAAN

For best results. Brush with some butter or oil and place under the grill until browned to the colour of your choosing.

Alternatively, you can warm through either in oven or wrap in a damp cloth and microwave until warmed through

Use our key on the website to ensure you can identify every dish correctly
